Directional buttons (down) / (left)	Move counterclockwise
button	Bark

Player 2 (2P) Controls

/ button	Move clockwise
/ button	Move counterclockwise
button	Bark

• Sheep Defence™ Rules

- 1P and 2P each control a sheep dog and protect the flock from wild beasts.
- The sheep dogs move around the flock and bark at enemies to turn them away.
- Protect the sheep until the time runs out to win.
- If all the sheep are taken away, the game is over.

• Pay attention to your stamina gauge

Your dogs need stamina in order to bark. If you bark too much, your stamina will disappear and your dog will tire out. Make sure to match your barking with the appearance of your enemies.

Your stamina will flash red when it runs low.

- Work together to protect the sheep

If the 1P and 2P dogs both bark when they're close together, their barks will be much more powerful. Use this technique to drive away bears and wolves that would otherwise be impossible to defeat.

— Caution

- Watch out for bear attacks

Wolves will just try to steal the sheep, but bears will get angry and try to attack you if you get too close to them. If they hit you, you will be unable to move for a while, so be careful.
